

## Ergo Tray With Angle And Height Adjustment

The Ergo Tray is a versatile product that can be used to work on a laptop, notebook or tablet on a couch, wide chair or even in bed. It can also be used as an eating surface on the couch or in bed. It can even be used for reading or writing and kids can use it to sit on the floor and draw.

The foldable legs allow for easy storage and the tiltable top enables better positioning when typing or writing.

### Features:

**Versatile** – This is a multifunctional table and will be a much-loved addition to your office, home or home office. It can be used as a multifunctional workstation, a snack tray when watching TV, a laptop or tablet stand for use in bed or on the sofa or a food tray to enjoy breakfast in bed.

**Left or right-handed users** – The wrist support (mouse stopper) and notebook stopper are interchangeable between the left and right side of the tray which allows mouse use by left or right-handed users.

**Working healthier** – The Ergo Tray can be used as a standing desk for shorter periods of laptop work. It needs to be used on a desk of normal height by users not taller than around 1.80m. Alternating between sitting and standing while working can reduce muscular-skeletal conditions such as backache, neck pain and muscle spasm caused by sitting for extended periods of time in a sustained position.

**Easy to use** – Easy height adjustments using an auto-lock button on each side. The surface angle is also adjustable between 0° – 30° with effortless locking and unlocking at 3 different angles.

**Lightweight and sturdy** – Besides being ergonomic, this well-designed and durable table is also light enough to carry around. It offers good stability and a sturdy work surface once it has been locked in place.

**Portable** – Apart from being lightweight, this table is foldable, making it easy to take anywhere or to store away.

**Kids friendly** – The Ergo tray is a great product for children to work on in bed or on the couch. It can also be used for drawing or reading when sitting on the floor.

Ergo Optimize

## Specifications:
