

## ON-DESK SIT-STAND WORKSTATIONS

### Flexispot M7B Sit-Stand Standing Desk Converter

Transform your traditional desk into an active sit-stand workstation with the 28" M7B desk riser from Flexispot. This unique standing desk converter sets itself apart from other desk risers with a one-of-a-kind, u-shaped design that expands the keyboard workspace to offer you more space to work on. It's ideal for writing, drawing, comfortable laptop use, or for adding a full-sized keyboard and mouse.

#### FEATURES:

- **Flexible height adjustment:** adjust the desk height to a level that perfectly suits you.
- **Extra spacious work surface:** the M7B offers additional space for your computer monitor, paperwork, and desk accessories. It has an oversized u-shaped keyboard tray that accommodates flexible setup options like a 17-inch laptop or a full-sized keyboard and mouse.
- **Quick-release, removable keyboard tray:** easy one-step attachment and release gives you the option to use the desk riser with or without the keyboard tray.
- **Integrated air technology:** the smart x structure and gas spring hovering system provide smooth and even support for transitioning from sitting to standing. The x structure is safer and more reliable than the lifting mechanism of other brands.
- **Straight up and down movement:** the M7B rises and folds vertically, within its own footprint. There's no need to make spatial accommodations, as may be required in comparable products.
- **Optional monitor arm:** the unit has the option to add a compatible, Flexispot monitor arm using the pre-drilled hole on the top worksurface. Monitor arms are sold separately.

#### SPECIFICATIONS:

-  Product weight: 14,2kg
-  Maximum loading weight limit: 15kg
-  3 years warranty.
